

GETTING READY FOR YOUR PAINTERS

What to Expect on Painting Day

A walkthrough of your project day, from crew arrival to final sign-off

Before the Crew Arrives

Double-check that your prep checklist is done – cleared rooms or yard, pets secured, and access ready. This helps us start right on time.

Crew Arrival & Setup

Your crew arrives within the scheduled window and begins setting up drop cloths, tape, and equipment before any paint is opened.

Kickoff Walkthrough

Your project lead walks the space with you to confirm colors, sheens, and scope one more time before work begins.

Prep & Protection Work

Surfaces are cleaned, repaired, and taped off first – often the most time-consuming and least visually exciting part of the day.

Painting Begins

Cutting in and rolling – or spraying – starts once prep is complete. Expect to hear activity throughout the home or around the exterior.

Midday Check-In

Your project lead or crew checks in partway through the day with a progress update and answers to any questions you have.

East Dallas Painting

CONTINUED

☐ Cleanup Between Coats

Tools are cleaned and surfaces re-protected between coats – a tidy job site is part of how we work, start to finish.

☐ Final Coat & Detail Work

The final coat goes on, followed by detail work on trim, edges, and any small touch-ups the crew catches along the way.

☐ End-of-Day Walkthrough

Before the crew leaves, we walk the finished space with you, point out anything still drying, and confirm you're happy with the work.

☐ Site Cleanup

Drop cloths, tape, and debris are cleared away, and the space is left as clean – or cleaner – than we found it.

☐ Multi-Day Projects

For larger jobs, we'll let you know exactly what to expect overnight and each following morning until the project is complete.

☐ Your Final Walkthrough & Sign-Off

Once everything is complete, we walk through the finished project together to confirm the work meets your expectations.

QUESTIONS DURING YOUR PROJECT?

We're Here to Help
